

## Lakes to Land Initiative: Community Progress Table

The table below allows you to track the progress of your community within the Lakes to Land Initiative. Each community that does NOT already have an up-to-date master plan will be guided through community vision sessions and the master plan process (Steps 1-3) by Beckett and Raeder ([www.bria2.com](http://www.bria2.com)). Your local planning commission is responsible for completing master plans. Communities that already have a master plan will join the initiative to identify collaborative priorities and projects for implementation. Funding for the Lakes to Land Initiative is made possible by efforts of the Alliance for Economic Success (<http://www.allianceforeconomicsuccess.com/>).

If you have questions regarding your community's progress, contact your leadership team member or attend a planning commission working session. Contact information can be found at [www.lakeistoland.org](http://www.lakeistoland.org) or by calling **231-933-8400**.
